

BACHELOR of SCIENCE
Liberal Studies
Graphic Communications Concentration
Program Guide and Course Equivalency Guide for Glen Oaks Community College (2009-2010)

The Bachelor of Science Degree with a Graphic Communications Concentration is designed for the student with considerable transfer credit in liberal arts areas who desires a Bachelor of Science degree for entry into various fields. This degree requires at least 120 semester hours of course work and is designed to supplement learning already achieved, including strengthening it with the Miller College Core courses (which are part of the General Education Requirements) and additional Liberal Arts and Graphic Communications classes. Students must successfully complete 45 semester hours at the 300/400 level with at least 30 semester hours at Miller College and meet all Miller College graduation requirements to receive this degree. In keeping with the College Mission, students are expected to complete one hour of service learning for every hour they are enrolled at Miller College. Service learning may be performed at any time prior to completion of the Senior Seminar. *The purpose of this guide is to outline the Liberal Studies program's requirements for the catalog year noted above. Please be aware that your catalog year and requirements are determined by the first semester in which you actually take classes at Miller College.*
