

BACHELOR of SCIENCE
Elementary Education
Program and Course Equivalency Guide for Kellogg Community College (2010-2011)

The Bachelor of Science Degree with an Elementary Education major requires as many as 136 semester hours of course work. The Teacher Education Program emphasizes practical knowledge, field experiences, and professional development so that graduates of the program are equipped with knowledge to serve as excellent teachers of children and educational leaders in public and private schools. Graduates will have the necessary knowledge and skills to enhance the learning environments and positively impact the lives of others. In keeping with the College Mission, students are expected to complete one hour of service learning for every hour they are enrolled at Miller College. Service learning may be performed at any time prior to completion of the Senior Seminar. *The purpose of this guide is to outline the Elementary Education program's requirements for the catalog year noted above. Please be aware that your catalog year and requirements are determined by the first semester in which you actually take classes at Miller College.*

Degree Requirements
